1.2 Select GET to download the application from App Store
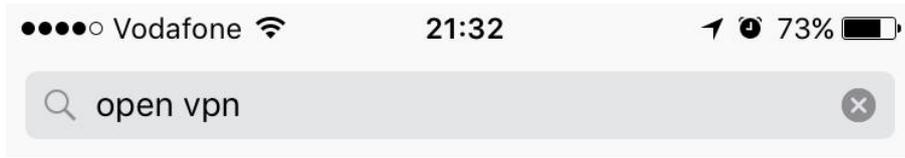

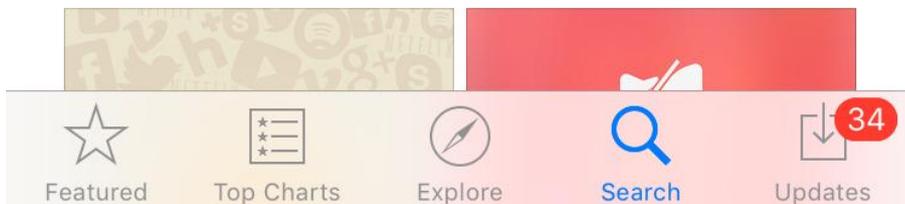

1.3 launch OpenVPN Application
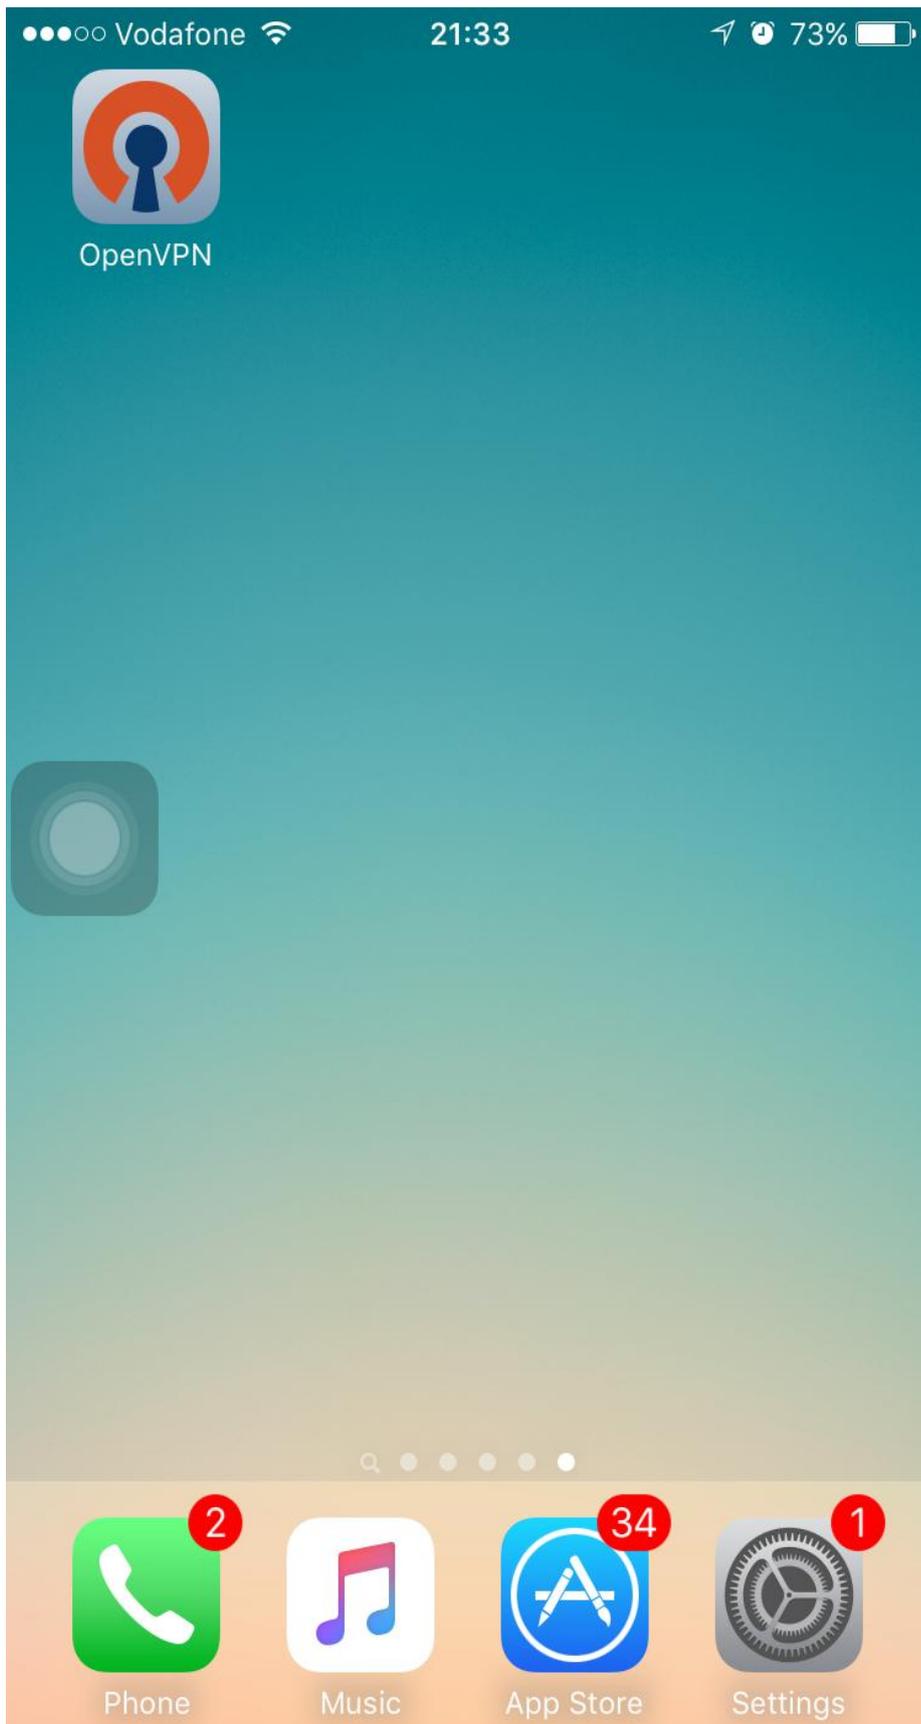

1.4 in Field - Access Server hostname – type - gw.ubanvpn.com, select – return

About   **OpenVPN**   ✖ Help

WELCOME TO OPENVPN

OpenVPN requires a profile (.ovpn file) to connect to a server. Please use one of the following apps to import a profile:

Import your Private Tunnel profile.   Go

If you are importing a profile from an OpenVPN Access Server, log into the server using Safari and click on "user-locked" or "autologin" profile.

Enter Access Server hostname

Using iTunes Sync, select your device, go to OpenVPN under the "apps" tab, and drop your .ovpn and related cert/key files into the file sharing window.   ›

If you receive the profile as a .ovpn attachment in the Mail app, you can open it in OpenVPN (Note: this method is less secure).
