

UbanVpn Setup wizard V 1.2

1 Unpack the ubanVpn Package

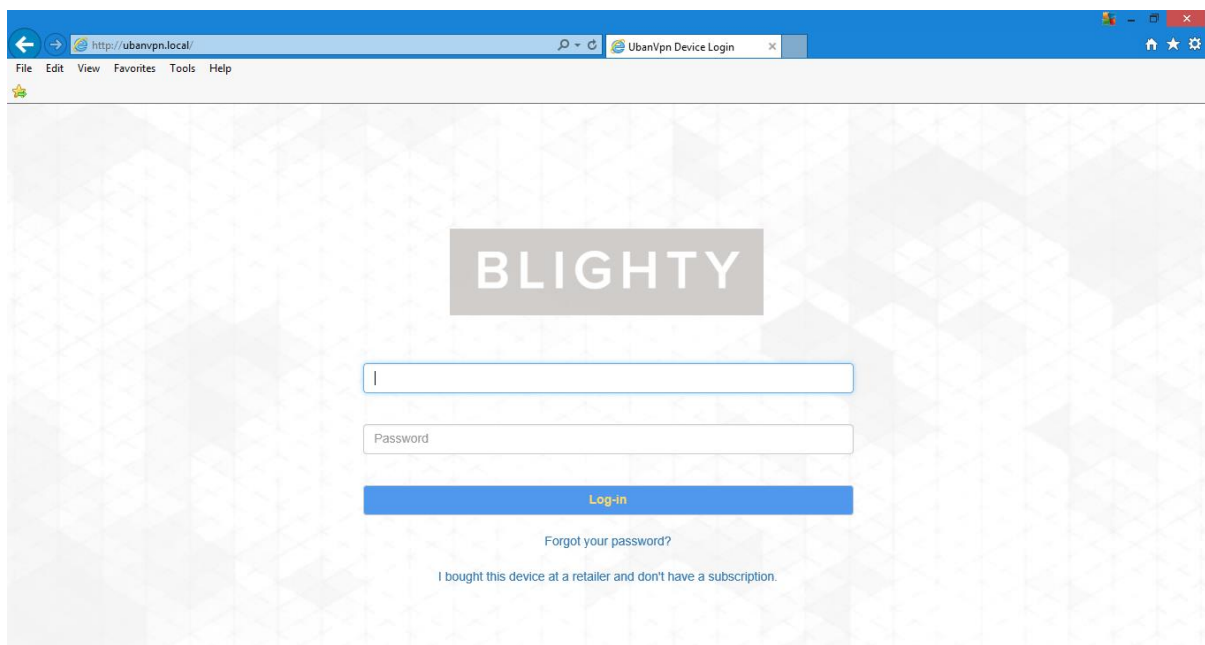

2 Connect power adapter, Ethernet cable to the device

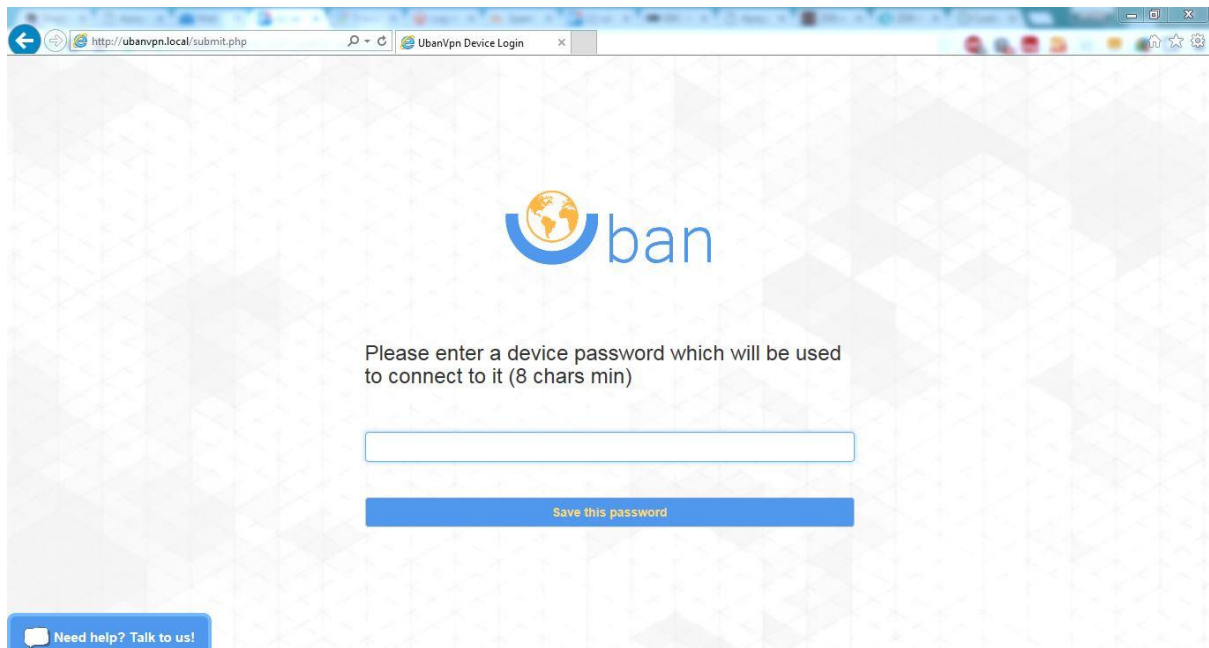

3 On the PC/Laptop/Mobile you need to connect to a default Wi-Fi named **UbanVpn** in the List of Networks.

4 Open browser enter address <https://ubanvpn.local> and press return

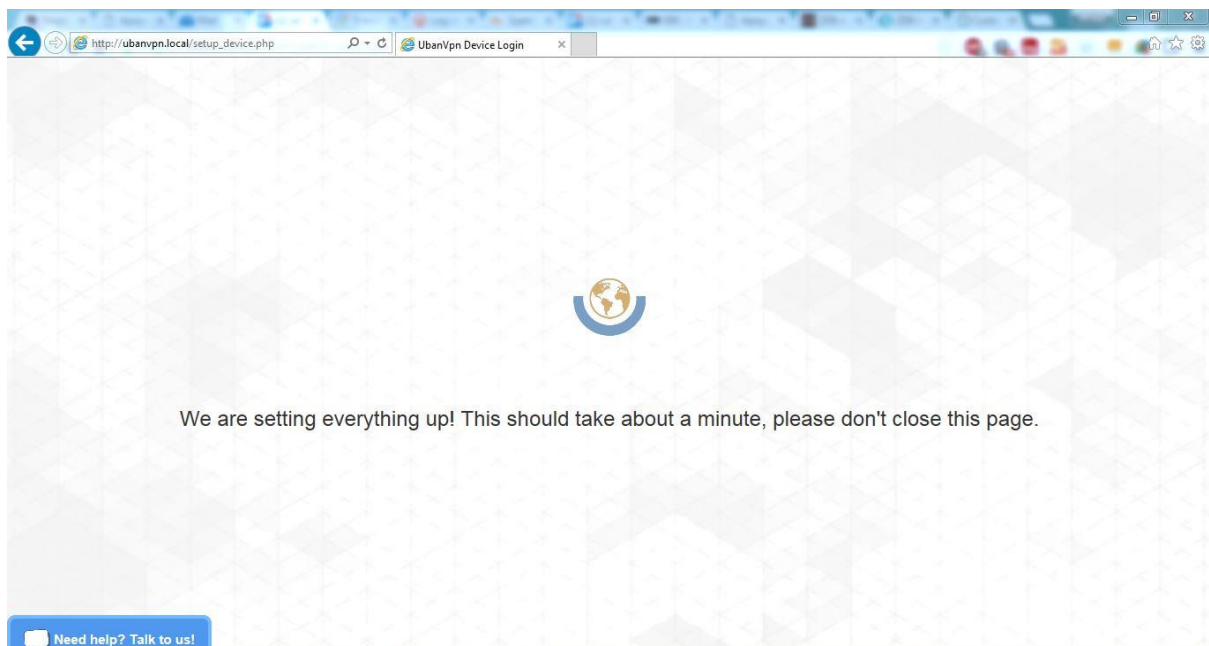

5 Enter the Supplied username and password sent in the welcome mail or The Email Address which you have used for registration when buying the service or the product on the <http://www.Blighty.Online> website.

6 Enter preferred password which will be later used to connect the device.

7 Wait for a while as the device is rebooting and is setting everything up.

8 Make a Note of Network name and Password.

Your VPN device has been successfully set up, you can now use any device to connect to it via WiFi with the following credentials:

Connection status: **Online**

Network name: **UbanVpn_a650**

Password: ********* 

9 Connect to the ubanVpn Wi-Fi network with password.

That's it!! Enjoy all your home country webpages.
